Quality, logistics and commercial support

SERMAT
Servicios

MSI ARGENTINA S.A.

We are a service company focused on the need of the metallurgical and automotive industry providing support in the quality, logistics and commercial areas. We have the experience and business development to deal with any challenge as an aim to be reached.

SERMAT Servicios headquarters is in Córdoba, Argentina, a strategic point of the metallurgical and automotive industry, in order to meet its customers' different demands in an effective, efficient and reliable way.

We make available all our experience to satisfy our customers. We provide a reliable and sustainable in time service. We have the experience to deal with any challenge as an aim to be reached.

CEO | Darío Marchisio:

From the year 2000 up to the beginning of 2012 I developed my activity in the metallurgical industry, especially in the automotive industry, as an employee in charge of the technical and commercial area of 4 multinational companies from Brazil.

In parallel, in 2010, I began a business in the automotive area with SERMAT SERVICIOS, providing quality control,

parts selection and re-work services.

By mid 2012, for growth and extension reasons we created MSI ARGENTINA S.A, where we keep the trade name SERMAT SERVICIOS as a matter of business development and trajectory.

Today we have 15 years of experience in the automotive industry and we provide support to more than 20 customers in matters as quality, logistics and commercial support.

**Quality,
Logistics and
Commercial Support**
